

On a mission for America.

J.C.'s Lighthouse's "Light Card"

Our group is preparing to begin recruitment of services to benefit area foster/adopt families. J.C.'s Lighthouse's "Light Card" Project works with area businesses to build coupon or discount service directories that will be gifted to licensed foster homes. The effort will serve area foster children and their new families with fun and useful opportunities to enjoy life. We are encouraging families that serve this vital need with our acts of community love and support, as well as, appealing to those that may be considering fostering children to take the next step. It is a special love gift program encouraged by President Bush's talks about *"Faith Based Initiatives" supporting community needs in areas of social services*. The signing of businesses to the directories will begin immediately. Interested businesses should call in to help complete this effort. _____ or Email us at _____

On a mission for America.

J.C.'s Lighthouse's "Purple Pages"

Our group is preparing to begin recruitment of people to be foster/adopt families. J.C.'s Lighthouse's "Purple Pages" program works by handing out purple papers in the community for the purpose of foster parent recruitment. The papers give phone numbers and information to people interested in checking into the possibility of becoming a foster parent. The program was designed to give a voice to actual foster children so they could address the general public about the need for foster families. The pages contain children's messages and drawings that were originally printed in 2001. The consensus is that the painless test to see if one can foster or not, is an investment worth making. Even single and older people can foster children and affect a life for the better.

Interested parties can call in to help complete this effort.
